

The Effects of Addictive Substances and Behaviors on the Adolescent Brain

Presented by **Stephen L. Dewey, Ph.D.**

September 26, 2019 | 7:00pm – 9:00pm

Rumson-Fair Haven High School Auditorium | 74 Ridge Road, Rumson, NJ 07760

Parents & Community Welcome

PRESENTATION HIGHLIGHTS

- Understand how pre-existing differences in brain dopamine underlie the risk of unmasking the disease of addiction.
- Compare and contrast how drug use affects the developing adolescent and adult brain.
- Examine the use of cell phones and video gaming on dopamine concentrations.
- Discuss a range of drugs and learn how the environment causes relapse to drug-seeking behavior.
- Discuss the science behind vaping and report recent clinical findings following both acute and long-term use.
- Empower parents with the knowledge and confidence to guide their children through their adolescent and teen years.
